Safety instructions and other important information

English (GB) Safety instructions

Original safety instructions

These safety instructions give a quick overview of the safety precautions to be taken in connection with any work on this product.

Observe these safety instructions during handling, installation, operation, maintenance, service and repair of this product.

These safety instructions are a supplementary document, and all safety instructions will appear again in the relevant sections of the installation and operating instructions.

Keep these safety instructions at the installation site for future reference.

Warning

Prior to installation, read these installation and operating instructions. Installation and operation must comply with local regulations and accepted codes of good practice.

Warning

If these safety instructions are not observed, it may result in personal injury.

Warning

If these instructions are not observed, it may lead to electric shock with consequent risk of serious personal injury or death.

Warning

The surface of the product may be so hot that it may cause burns or personal injury.

Caution

If these safety instructions are not observed, it may result in malfunction or damage to the equipment.

Note

Notes or instructions that make the job easier and ensure safe operation.

Observe the safety instructions to ensure correct installation, operation and maintenance of the motor. The instructions must be known by any person installing, using or maintaining the motor. Failure to observe the instructions may invalidate the warranty. Safety equipment required to prevent accidents must be made available according to local safety instructions.

Delivery and handling

Caution

Do not use sharp tools when unpacking the motor.

If MG motors are stored, the shaft must be turned by hand at least once a month to prevent it from getting stuck and to distribute the bearing grease.

Caution

If the motor has been stored for more than two years before installation, the rotating parts must be dismantled and checked. Relubricate motors with lubricating nipples. Replace the greased-for-life bearings.

Identification

Both 50 and 60 Hz data are indicated on the nameplates for three-phase motors.

Note

Only 50 or 60 Hz data are indicated on the nameplates for single-phase motors. Only 60 Hz data are indicated on previous versions of ML motors.

Construction

Caution

If the drain plug is removed, the motor enclosure class will change from IP55 to IP44.

Operating conditions

Caution

If the motor load is not reduced in case the ambient temperature or installation altitude is exceeded, the motor life will be limited, and the warranty is void.

Caution

Frequency converter operation of MG motors without phase insulation will cause damage to the motor.

Mechanical installation

Caution

Non-compliance may result in functional faults which will damage the motor components.

Electrical installation

Warning

Make sure that the power supply cannot be accidentally switched on during the electrical installation.

Warning

The motor must be connected to an external mains switch.

Warning

Whenever motors incorporating a thermal switch or thermistors are to be repaired, make sure that the motor cannot start automatically after cooling.

Warning

Before removing the terminal box cover and before any dismantling of the motor, switch off the power supply.

Warning

The motor must be earthed.

Do not connect the motor to the voltage supply until the connection to earth has been carried out in accordance with local regulations.

Startup

Warning

When measuring the insulation resistance, carefully follow the safety regulations of EN 50110-1 (operation of power plants) and the instruction manual for measuring and test equipment.

Warning

During and immediately after the measurement, there will be a risk of electric shock. Do not touch the terminals until the windings are de-energised.

Note

Remove any drain plugs before heating.

Caution

Some MG motors have a properly directed fan. The direction of rotation must be as stated on the motor.

Operation

Warning

During operation, the motor surface may be so hot that it may cause personal injury.

Maintenance

Note

Never mix grease with thickeners, such as lithium-based grease with polycarbamide-based grease.

Fault finding

Warning

Before starting fault finding, switch off the power supply. Make sure that the power supply cannot be accidentally switched on.

Motor service and fault finding must be carried out by qualified personnel.

Service

Caution

Do not expose the bearings to impacts or shocks.

Disposal

This product or parts of it must be disposed of in an environmentally sound way:

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

The crossed-out wheellie bin symbol on a product means that it must be disposed of separately from household waste. When a product marked with this symbol reaches its end of life, take it to a collection point designated by the local waste disposal authorities. The separate collection and recycling of such products will help protect the environment and human health.
