Warning

Prior to installation, read this document and the quick guide. Installation and operation must comply with local regulations and accepted codes of good practice.

Warning

This product may be used by children aged 8 years and above as well as persons with reduced physical, sensory or mental capabilities or lack of experience with and knowledge of the product, provided that they are under supervision or have been given clear instructions concerning the safe use of the product. Such persons must also understand the hazards involved in the use of the product. Never allow children to play with the product. Cleaning and user maintenance must not be carried out by children or persons with reduced physical, sensory or mental capabilities without proper supervision.

1. Symbols used in this document

Warning

If these safety instructions are not observed, it may result in personal injury.

Warning

If these instructions are not observed, it may lead to electric shock with consequent risk of serious personal injury or death.

Warning

The surface of the product may be so hot that it may cause burns or personal injury.

Warning

Risk of dropping objects which may cause personal injury.

Warning

Escaping vapour involves the risk of personal injury.

2. Type key

Code	Example	MAGNA1	(D)	80	-120	(F)	360
	Type range						
	MAGNA1						
	Single-head pump						
D	Twin-head pump						
	Nominal diameter (DN) of inlet and outlet [mm]						
	Maximum head [dm]						
	Pipe connection						
	Threaded						
F	Flange						
	Port-to-port length [mm]						

3. Pumped liquids

Warning

The pump must not be used to pump flammable, combustible or explosive liquids.

4. Installation

4.1 Safety symbols on the pump

Observe the position of the clamp before the clamp is tightened.

Incorrect position of the clamp will cause leakage from the pump and damage the hydraulic parts in the pump head.

Fit and tighten the screw holding the clamp to $8 \text{ Nm} \pm 1 \text{ Nm}$. Note: Do not apply more torque than specified even though water is dripping from the clamp. The water (condensed) is most likely coming from the drain hole under the clamp.

4.2 Changing the control box position

Warning

Observe local regulations setting limits for manual lifting or handling.

Warning

Before dismantling the pump or related parts, drain the system and close the isolating valves on both sides of the pump as the pumped liquid may be scalding hot and under high pressure.

Warning

When loosening the clamp, do not drop the pump head.

Warning

Risk of escaping vapour.

5. Electrical connection

Carry out the electrical connection and protection according to local regulations.

Warning

Switch off the power supply before making connections.

Warning

The pump must be connected to an external mains switch with a minimum contact gap of 3 mm in all poles.

Earthing or neutralisation can be used for protection against indirect contact. If the pump is connected to an electric installation where an earth leakage circuit breaker (RCD/RCCB) is used as an additional protection, this circuit breaker must trip when earth fault currents with DC content (pulsating DC) occur. The earth leakage circuit breaker must be marked with the first or both of the symbols shown below:

Warning

It must be possible to lock the mains switch in position 0. Type and requirements as specified in EN 60204-1, 5.3.2.

6. Operation

Warning

At high liquid temperatures, the pump may be so hot that only the button should be touched to avoid burns.

The surface of the pump may be so hot that it may cause burns or personal injury.

7. Fault finding

Warning

Before dismantling the pump or related parts, drain the system and close the isolating valves on both sides of the pump as the pumped liquid may be scalding hot and under high pressure.

Warning

If the power supply cable is damaged, it must be replaced by the manufacturer, the manufacturer's service partner or a similarly qualified person.

8. Technical data

8.1 Ambient temperature

0 to 40 °C.

8.2 Maximum system pressure

The maximum system pressure is indicated on the nameplate:

PN 6: 6 bar / 0.6 MPa

PN 10: 10 bar / 1.0 MPa

PN 16: 16 bar / 1.6 MPa
