TM06 2345 4014

5.2.2 Setting the code in Grundfos GO

You can define a default connection code in Grundfos GO so that it automatically attempts to connect to the selected product via this code.

When a product with the same connection code is selected in Grundfos GO, the Grundfos GO automatically connects to the product without having to press the connection button on the module.

Define the default code in Grundfos GO in this way:

1. In the main menu, under [General], select [Settings]. See fig. 6, pos. 2.
2. Choose [Remote].
3. Enter the connection code in the field "Preset connection code". The field now says "Connection code set". See fig. 8.

You can always modify the default connection code by pressing [Delete] and entering a new one.

If Grundfos GO fails to connect and ask for pressing the connection button on the product, it means that the product has no connection code or has a different connection code. In this case, you can only establish connection via the connection button.
